bukly and simplisitic  
maybe worth a dollar. Pros:

Jog on the spot locomotion  
Only costs \u00a31.67  
Graphics options, including in game supersampling  
Change gun grip angle

Cons:

Can barely make out distant robots  
Gun is very inaccurate, even slowing down and using the sight  
Robot bullets are incredibly fast, not being hit seems to come down to luck

Can't grumble at just over a quid, but with the speed of enemy bullets, inaccuracy of yours, and distant robots being hard to see, how much you progress comes down to luck.. i love itttt. Update: The audio was fixed. Also, from what I gather, video quality is similar with all releases of the movie. It's just old and hasn't had a proper remaster like Akira for instance.

I would recommend this movie if Japanese audio was working properly. Currently it doesn't and it hasn't since the movie was released on Steam in the beginning of the year. If you don't care about that, there is the issue of quality. I don't know how it compares to the Blue-Ray release but this version doesn't look too good.

TL;DR - Do some research before you buy, also test if the player works on your PC by viewing one of the CS:GO ads in the video section of you library.. It's a fun game if you like sci-fi RPGs, or any kind of RPGs for that matter. You can fly around the galixy, I mean whats not cool about that? you can go on planets and either befriend them by doing a bunch of side quests or you can grind the entire place to dust with your cool space guns (recomended). so you can either be the hero of the galixy, or rule it with an iron fist.. I really wish I could give this game a mixed review and not just a thumbs up or a thumbs down. It was certainly interesting, the plot was fun and the concept was great.

However playing it often times felt tedious. The puzzles were often recycled and in the hidden picture scenes it could be almost impossible to find hidden objects due to their color or location. The game clearly wanted you to use the magnifying glass the

---

provide you with to find those objects, but again it just seems tedious. I wish I could give this game a stronger recommendation based on the plot alone, but the way the game ends on a huge cliff hanger with no sequel currently available prevents me from doing so.

While I recommend this game if you are in to puzzle/hidden object games I'm glad I got it at the sale price instead of paying the full \$5. How to make a garbage game list:

1. Use resident evil styled camera angles
2. Get voice actors who are worse than those in hidden object games
3. Make sure the graphics are worse than something developed by one man indie projects
4. Have repetitive boring music
5. Make sure every cliché is present within the story

Congratulations you are now the proud developer of Face Noir.. Don't buy this game. Buy ATS or ETS2. I know this was a before ATS or ETS2 but playing the game back in the day was fun. But now it's not.

---

Excellent execution on an original idea.. repetitive turns boring. wtf did i just watch some trailer?. the story is good and the puzzles are well done. problem is when the game is almost done it gets bugged and wont let me keep going. sorry but its broken. Awesome game puzzles to easy tho :). This game is a lot of fun. It's like a mix of Rugby, Basketball, American Football, Soccer, Lacrosse, all rolled into one... oh and someone removed all the gravity from the room!

It's so much fun. When you score, or make a great defensive play you really feel like you achieved something in a real sport. It has local multiplayer and local co op, so you can have some great times playing with family and friends, I think even the little ones can pick up on the game fast. To bad you can't play online, but to be honest I'm having so much fun with the game I haven't missed online play yet, plus sometimes online play can sour a game because people start complaining and stuff get's nerf'd, (you know how that is).

I think the game could use a few more features though; to make it a epic sports game. Like making your own team, a season mode, tournament mode, I mean you can make your own seasons and tournaments with some pen and paper, but it would be cool if you could just do it in game. Overall it's a excellent game. I highly recommend it.
